## **DETAILED ACTION**

### ***Notice of Allowance***

The examiner is in receipt of applicant's filings dated 10/5/2004 and 2/4/2005. Acknowledgement is made to the amendment to claims 1,4-8,11-15, and 18-21, leaving claims 1-21 as pending in the instant application. Applicant and the examiner conducted an interview on 4/13/2005 and agreed to amendments to claims 1,6,13 and 20 and the cancellation of claims 5,12 and 19 as is outlined in the examiner's amendment below: The applicant's amendment was carefully considered and was found to be persuasive, therefore the following reasons for allowance follows:

### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Wing Mok on 4/13/2005.

**Cancel** claims 5,12 and 19 and amend the following claims:

***Reasons for Allowance***

Claims 1-4,6-11,13-18,20 and 21 are allowable.

The following is an Examiner's statement of reasons for allowance for independent claims 1,8 and 15.

The present invention is directed to a method, computer program, and system for determining a discount for a product ordered over the internet by detecting the use of a wireless communication protocol, mapping the order request to a plurality of discount scheme tables and calculating the discount using the discount scheme table that produces the greatest savings for the customer.

**Claim 1:**

determining that the client machine is using a wireless communication protocol, computing a discount based on a discount scheme selected from the discount scheme table, and wherein the discount scheme table includes a plurality of discount schemes,

wherein the discount is computed using a discount scheme from the plurality of discount schemes that produces greatest savings for the customer.

**Claim 8:**

instructions for determining that the client machine is using a wireless communication protocol,

instructions for computing a discount based on a discount scheme selected from the discount scheme table, and wherein the discount scheme table includes a plurality of discount schemes,

wherein the discount is computed using a discount scheme from the plurality of discount schemes that produces greatest savings for the customer.

**Claim 15:**

a first processing component which determines that the client machine is using a wireless communication protocol,

a processing component which computes a discount based on a discount scheme selected from the discount scheme table, and wherein the discount scheme table includes a plurality of discount schemes,

wherein the discount is computed using a discount scheme from the plurality of discount schemes that produces greatest savings for the customer.
